THE SCIENCE OF EMOTIONS & THEIR IMPACT ON BEHAVIOUR

**NEW Suitable for Adult Focused Clinicians*

OAKVILLE | MAY 17, 2017

Oakville Conference Centre | 2515 Wycroft Rd

There is much focus today on children's emotions. Constructs like emotional intelligence, emotional self-regulation and emotional well-being are being bandied about. Emotion, long dismissed as a nuisance factor, is now confirmed to be at the core of development and well-being. Yet little is being taught about the nature of emotion or the implications for parenting and teaching and treatment. In this workshop, Dr. Neufeld does a brilliant job of putting the pieces together to make sense of emotion, revealing the emotional roots of many behavioural problems, and clarifying the challenges for parents, teachers and professionals. 🌱

LEARNING OBJECTIVES

- » Cultivate an appreciation of the pivotal role of emotion in development, perception & behaviour
- » Develop a language of emotion that can be used to reframe problems, lead to solutions, and provide access to intuition
- » Understand how emotional development unfolds, so as not to get caught in a battle against symptoms or sabotage the process by pushing for results

WORKSHOP AGENDA

Session 1 - Expression of Emotion

- » The first of the three laws of emotion is that emotion seeks expression

Session 2 - Thwarted Expression

- » The first challenge in dealing with problems rooted in emotion is to facilitate the expression of emotion

Session 3 - Feelings & Hurts

- » The second law of emotion is that emotion seeks consciousness

Session 4 - Balance & Self-Control

- » The third law of emotion is that emotion seeks equilibrium, resulting in balance, stability and self-control

Session 5 - 5 Steps to Emotional Health & Maturity

- » The 5 stages in emotional development are outlined

Session 6 - Viewing & Treating Troubling Behaviours as Emotional Problems
