 **Ross W. Greene, PH.D.** is the originator of an empirically supported model of care now called Collaborative & Proactive Solutions, author of the influential books *The Explosive Child* and *Lost at School*, and founding director of the non-profit Lives in the Balance, which provides a vast array of free, web-based resources on his model and advocates on behalf of behaviourally challenging kids and their parents, teachers, and other caregivers. Dr. Greene served on the teaching faculty at Harvard Medical School for over 20 years (1992 to 2014), and is currently adjunct associate professor in the Department of Psychology at Virginia Tech. He lectures and consults widely throughout the world, and has authored articles, chapters, and research papers.

 **Lynne Kenney, PSY.D.** is a practicing pediatric psychologist and media host in Scottsdale, AZ. Dr. Kenney is one of “the most accessible pediatric experts,” in the US. Recently named one of the Top 100 Docs to “Listen to” on Twitter and a featured expert in Parents, Parenting and People Magazines.

 **Lynn Miller, PH.D.** is a licensed psychologist, certified cognitive behaviour therapist, and is an Associate Professor Emeritus in the Education and Counseling Psychology and Special Education department at the University of British Columbia.

 **Lynn Lyons, MSW** is a clinical social worker and psychotherapist specializing in the treatment of anxious children and their parents, with a special interest in interrupting the generational patterns of anxiety in families. Lynn presents internationally to organizations and schools

 **Lisa Ferentz, LCSW** is an Internationally recognized expert in the treatment of trauma and has been in private practice for over 30 years. She presents workshops and keynote addresses throughout the US and Canada, and is a clinical consultant to practitioners and mental health agencies.

 **Don Meichenbaum, PH.D.**, is Distinguished Professor Emeritus, University of Waterloo. Dr. Meichenbaum is one of the founders of Cognitive Behavior Therapy. He is presently Research Director of the Melissa Institute for Violence Prevention in Miami, Florida. www.melissainstitute.org

 **Gordon Neufeld, PH.D.** is a developmental psychologist who consults with parents and professionals regarding children and their problems. He brings to us his unique synthesis of the developmental literature and his exceptional ability to make children understandable.

DAY 1 | Monday, November 7, 2016

DAY 2 | Tuesday, November 8, 2016

DAY 3 | Wednesday, November 9, 2016

1st KEYNOTE

Ross W. Greene, PH.D.
8:30 AM – 10:15 AM

Collaborative & Proactive Solutions:
Fostering the More Positive Side of Human Nature

Dr. Greene’s Collaborative & Proactive Solutions (CPS) model has historically been applied to kids with social, emotional, and behavioural challenges. But the model is equally applicable to less challenging kids, especially if caregivers are interested in teaching the skills that foster the more positive side of human nature.

2nd KEYNOTE

Lynne Kenney, PSY.D.
10:30 AM – 12:00 PM

20 Proven & Effective Self-Regulation Strategies: For Children with Sensory Disorders, Learning Disabilities, Anxiety and ADHD

This keynote will give you 20 effective self regulation strategies to better understand and intervene with children who have challenges with sensory processing, dysregulation, anxiety and executive function. Dr. Kenney will integrate research from neuroscience, kinesiology, occupational therapy, music and speech/ language therapy. We will explore cognitive and movement activities to improve learning and behaviour.

1st KEYNOTE

Lynn Lyons, MSW
8:30 AM – 10:15 AM

Anxious Kids, Anxious Families

Anxiety disorders take a tremendous toll on individuals and families. By demanding certainty and comfort in rather dramatic fashion, anxiety grabs control in a way that interrupts lives, promotes avoidance, and leads to depression and physical issues. Anxiety runs in families, with children who are raised by a parent with an anxiety disorder being six to seven times more likely to develop anxiety themselves, thus interrupting this generational pattern of anxiety is critical.

2nd KEYNOTE

Lisa Ferentz, LCSW
10:30 AM – 12:00 PM

The Impact of Trauma on Children

In this keynote address we will explore the attachment styles that develop in dysfunctional and toxic families and the inherent challenge it creates for children when they are forced to stay connected to abusive caretakers. We will also process the long-term cognitive, behavioral, social, and emotional impact of trauma, abuse, and neglect. Participants will learn about factors that exacerbate the symptoms as well as mitigating factors that can reduce the impact on a child’s evolving development. Videotapes, clients’ artwork and case scenarios will give participants a greater understanding.

1st KEYNOTE

Don Meichenbaum, PH.D.
8:30 AM – 10:15 AM

Ways to Make Schools Safer, More Inviting and More Effective

Teachers are confronted by beginning students who may differ by as many as two to three grade levels and this educational gap is likely to increase over their years of schooling. This gap contributes to a high school drop out rate. In short, “smart” students keep getting smarter and the less school-ready students fall further and further behind. This keynote will consider how these differences emerge and offer specific ways to close this educational gap. How to make schools more inviting, safer and more pedagogically effective will be considered.

2nd KEYNOTE

Gordon Neufeld, PH.D.
10:30 AM – 12:00 PM

The Heart of the Matter:
The Science of Emotions

There is much focus today on children’s emotions. Constructs like emotional intelligence, emotional self-regulation, emotional well-being and emotional social learning are being bandied about like never before. Emotion, long dismissed as a nuisance factor, is now confirmed to be at the core of development and well-being. Yet little is being taught about the nature of emotion or the implications for parenting and teaching and treatment.

AFTERNOON CONCURRENT SESSIONS

Ross W. Greene, PH.D.
1:15 PM – 4:00 PM

A The Assessment of Lagging Skills and Unsolved Problems

If you want to help solve the problems that are setting in motion challenging behaviour, identify the skills that are contributing to those problems, and stop focusing on a kid’s challenging behaviour (and modifying it), you’ll need to identify to those lagging skills and unsolved problems. Fortunately, there’s an instrument – the *Assessment of Lagging Skills and Unsolved Problems* – to help you do it, and in this workshop, Dr. Greene teaches you how to use it.

 **\$10 OFF**

ENTER PROMO CODE: GREENE10BC

Lynne Kenney, PSY.D.
1:15 PM – 4:00 PM

B 20 Proven & Effective Self-Regulation Strategies

Higher functioning cognitive skills such as organization, planning, previewing, inhibition and self-regulation are essential for successful social, academic and interpersonal development. These are skills that some children are born with, but many are not. We can teach skill sets to children that will calm their bodies and their brains, enhance their thinking, improve their learning and help them to become healthier social beings. Through the use of case studies and interactive demonstration, Dr. Lynne Kenney will provide you with practical, effective and easily adaptable skill-building techniques and tools for children and adolescents with behaviour and mood management issues.

Lynn Miller, PH.D.
1:15 PM – 4:00 PM

C Fun!damentals of CBT with Children & Youth

Proven cognitive behavioural therapeutic activities can feel stiff and dull. This workshop will demonstrate innovative ways to implement CBT in interesting and engaging ways, with a focus on developmentally appropriate treatment approaches. Practical approaches to a wide array of presenting issues will be covered. The 5 major elements of CBT will be enhanced with skill development, generalization strategies, homework compliance, and client tailored interventions.

Ross W. Greene, PH.D.
1:15 PM – 4:00 PM

A Introduction to Plan B

When you’re solving problems collaboratively, you’re partnering with kids so solve the problems that affect their lives, improving communication, enhancing relationships, coming to solutions that are more durable and effective, and teaching lagging skills. In this workshop, Dr. Greene will review the basics.

 **\$20 OFF**
EARLY BIRD DISCOUNT
DEADLINE: OCTOBER 24, 2016

Lynn Lyons, MSW
1:15 PM – 4:00 PM

B Anxious Kids, Anxious Families

This workshop will focus on concrete, strategic interventions that move clients out of the “content trap” of the anxiety disorder and toward a process that interrupts anxiety’s predictable cognitive, behavioral, and physiological patterns. Participants will learn how to immediately and actively engage clients in active treatment using psycho-education and strategic homework assignments that move clients toward uncertainty (a key to successful treatment), address the use of safety crutches and avoidance, and promote the skills of differentiation and problem solving to combat the global avoidance style of anxious people.

Lisa Ferentz, MSW
1:15 PM – 4:00 PM

C Understanding & Working with the Developmental Challenges of Adolescence

Parents, teachers, and helping professionals often struggle in their interactions with adolescents: misreading their moods and needs, and inadvertently communicating in ways that create tension and increase disconnection. This workshop will offer adults new insights into adolescent development and the adolescent brain, which will increase their understanding and empathy towards teenagers. We will reframe “difficult” adolescent behaviours, giving participants a new way to understand and work with “resistance” and “non-compliance.” Particular attention will be paid to fostering cooperation and improving communication with adolescents.

 **UP TO \$100 OFF**
GROUP DISCOUNTS
SEE REGISTRATION PAGE FOR RATES.

Ross W. Greene, PH.D.
1:15 PM – 4:00 PM

A Advanced Plan B

If you’re clear on the basics, you’re ready for the more nuanced aspects of solving problems collaboratively, including strategies for gathering information about kids’ concerns, helping non-communicative kids express their concerns, dealing with defensiveness, and coming to realistic and mutually satisfactory solutions. Lots of sample videos in this workshop.

Don Meichenbaum, PH.D.
1:15 PM – 4:00 PM

B How to Make an Aggressive and Violent Youth: Implications for Prevention and Treatment Interventions

Aggressive behaviour is relatively stable throughout development. This workshop will consider the multiple pathways by which boys versus girls develop aggressive behaviours and the implications for both prevention and treatment. Specific guidelines and interventions will be offered on what can be done on a school-wide basis (for example, reading comprehension programs, bully prevention and parent involvement), and on a more in depth basis involving principals, school counselors and psychologists, and ways to conduct wrap around services. A consideration of what “works” and what makes things “worse”.

Gordon Neufeld, PH.D.
1:15 PM – 4:00 PM

C The Heart of the Matter: The Science of Emotions

In this workshop, Neufeld outlines five basic steps to emotional health and development so adults can foster emotional well-being and get to the root of such problems as alarm, anxiety, agitation, aggression, impulsiveness, lack of empathy, bullying, and so on. This workshop is powerful in the insight it provides as well as the changes it inspires. To make sense of emotion is to make sense of us all. There is no better way to glean insight into oneself and others. Having a working knowledge of the science of emotion should be a prerequisite for anyone responsible for children or working with adults.
